PROFILE

I am a self-motivated, focused and innovative web developer with experience in the design of interactive web applications, from initial conceptual stage to the detailed final design. I am keen to secure a role as a front or back end developer, and eager to contribute to team success by learning and developing new, existing skills.

SKILLS

- *HTML, CSS and JavaScript*
- *MongoDB, Express, React.js and Node.js (MERN)*
- *Experience with RESTful APIs*
- *Version control with Git, GitHub*
- *Next.js framework*
- *Python*
- *Critical thinking skill*
- *Solution-oriented*
- *Efficient time-management*

INTERESTS

- Artificial Intelligence
- Financial technology
- Energy Management
- Environmental Conservation
- Reading
- Travelling

EDUCATION

B.Sc. Civil Engineering

2014 – 2019

First Class Honours

University of Lagos, Akoka

WORK EXPERIENCE

Front End Developer Intern

Oct 2021 – Present

TM30 Global Limited

- Converted UI designs made from Figma, Adobe XD, Zeplin, and others, into real world applications.
- Optimized user experience, while ensuring to follow SEO best practices.
- Implemented full responsiveness and accessibility on websites.
- Created tools that improve site interaction regardless of the browser.

Full Stack Developer

Mar 2021 – Oct 2021

Freelance

- Created from scratch, an interactive web application that uses geocoding, authentication, accepts images, locations from the user and updates the database accordingly.
- Built and designed several interactive, dynamic websites that guarantee maximum user experience.

FEATURED PROJECT

Link'D

<https://link-d.herokuapp.com/>

- A social network web app, based on the MERN stack, that includes user authentication, profiles, forum posts, comments, likes among other features.
- Users' GitHub repos were connected to their profiles, and Gravatar was implemented to establish user identity.
